

PENINSULA BOOTH CONFIGURATION

SPECIAL NOTICE!

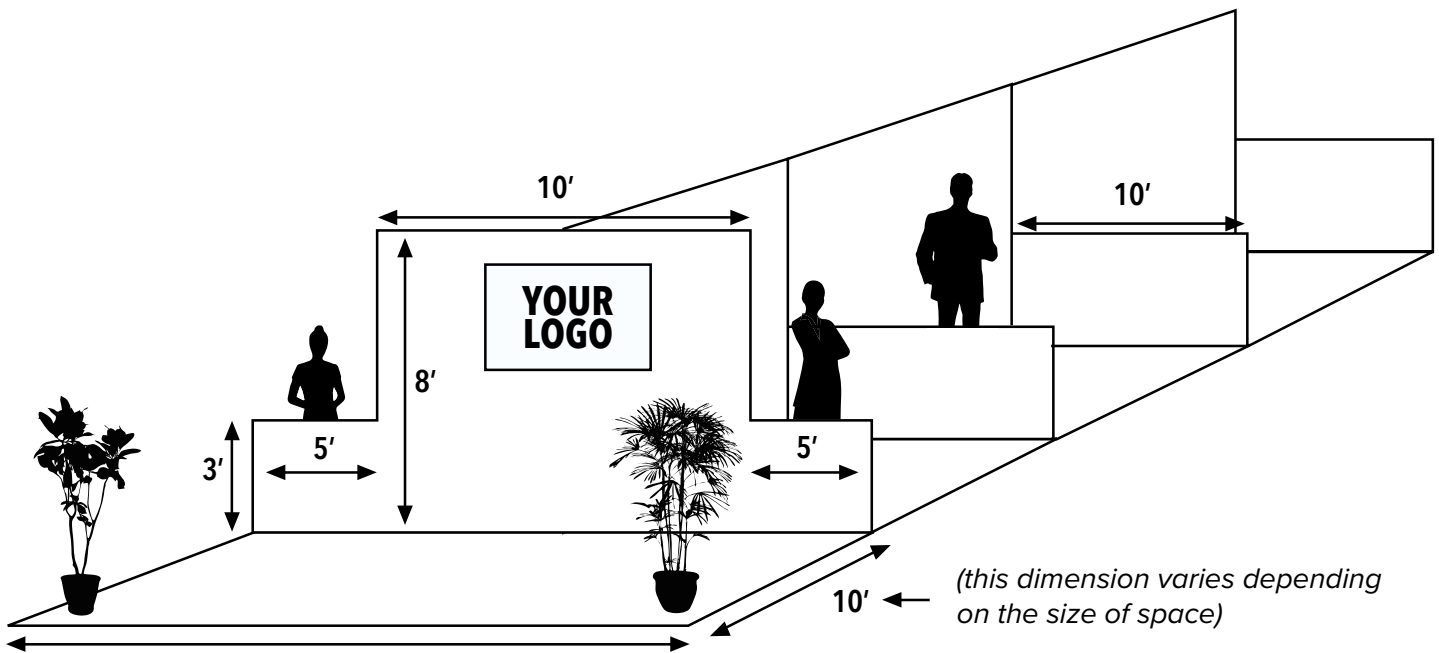

Peninsula (end-cap) booths are comprised of two corner booths, carrying two corner fees, and face three aisles.

To maintain sight lines, the width of the back wall of all peninsula booths must be limited to one-half of the overall width of the space, centered. Maximum height of the centered back wall is eight feet (8'), and the remaining back wall height cannot exceed three feet (3'). In addition, display materials may not block sight lines to adjacent booths. See illustration.

A booth design must be submitted to Exhibit Management for approval prior to move-in onsite.

Austin Convention Center
Austin, TX

Please review the following statement and complete the fields requested. By checking the box, you agree to accept these rules pertaining to your booth configuration.

I have reviewed the peninsula booth configuration guidelines as shown above on this document, acknowledge that these set up regulations apply to my booth at NCSC 2023 and agree to submit a booth design to Exhibit Management for approval prior to move-in onsite. Both I and our organization agree to follow these regulations during set up and all show hours while onsite. I also agree to communicate these guidelines to our onsite staff and others managing booth setup.
